

Material Safety Data Sheet

1. Company and Product Identific	Company and Product Identification			
	Product type: TYTAN® PROFESSIONAL ONE COMPONENT PRO EXPANDING POLYURETHANE FOAM SEALANT			
Product description : Sealing Foam)	Liquid urethane prepolymer mixture (Polyurethane			
Manufacturer:	SELENA USA, Inc. 21715 Beck Drive, Elkhart, IN 46516 USA			
Phone number: Emergency phone number Website:	(574)-523-0400; (877)-735-3627(toll free) : CHEMTREC +1 (800) 424-9300 www.SelenaUSA.com			

2. Hazards Identification

Emergency overview:

DANGER!

Extremely flammable aerosol. Harmful by inhalation, in contact with skin and if swallowed. Irritating to eyes and skin. Prolonged exposure may cause chronic effects. Harmful May cause sensitization by skin contact

OSHA regulatory status: This product is considered hazardous under 29 CFR 1910.1200

Potential health effects Exposure Routes:

Inhalation. Ingestion. Skin contact. Eye contact.

Inhalation: Vapors may irritate mucus membranes with tightness in chest, coughing, wheeziness or allergic asthma-like sensitivity. Extensive overexposure can lead to respiratory symptoms like bronchitis and pulmonary edema. These effects are usually reversible. Overexposure to gases may cause light headedness, headaches, or lethargy. Persons with cardiac arrhythmia may be at increased risk in severe exposure.

Skin contact: Causes localized skin irritation, reddening. Prolonged or repeated Exposure may lead to sensitization blistering, and/or dermatitis.

Eye contact: Causes eye irritation. For its adhesive feature, the foam contact with eyes may cause physical damage due to adhesive properties.

Ingestion: Harmful if swallowed. Ingestion may cause gastrointestinal irritation, nausea, and diarrhea.

Target organs: Central nervous system.

Chronic effects: May cause central nervous system disorder (e.g., narcosis involving a loss of coordination, weakness, fatigue, mental confusion and blurred vision) and/or damage.

Signs and symptoms: Narcosis. Decrease in motor functions. Behavioral changes. **Potential environmental effects:** May cause long-term adverse effects in the environment.

3.	3. OSHA Hazard Components			
	CAS Number Wt[%]	Component name		
	9016-87-9 <30.0	Methylenediphenyl diisocyanate Isomers (Polymeric MDI)		
	101-68-8 <30.0	4,4'-methylenediphenyl diisocyanate (MDI)		
	115-10-6 <15.0	Dimethyl ether		
	74-98-6 <20,0	Propane		
	106-97-8 <20,0	Butane		
	75-28-5 <20,0	Isobutane		
	The above components are hazardous as defined in 29 CFR 1910.1200.			
	Not Available < 50.0	Urethane Pre-Polymer Blend (Using Non-Hazardous Proprietary Polyol Blend)		

4. First Aid Measures

Eye Contact: Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention if irritation persists after washing.

Skin Contact: Remove the foam from skin using a cloth. Remove contaminated clothes immediately. Remove uncured foam from skin using delicate solvent like acetone or mineral spirit (avoid contact with eyes). Hardened foam may be removed by persistent washing with soap and large water quantity. If irritation develops, use a delicate cream. Remove and isolate contaminated clothing and shoes. Get medical attention immediately. Wash clothing separately before reuse.

Inhalation: Oxygen or artificial respiration if needed. Do not use

mouth-to-mouth method if victim inhaled the substance. Induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Get medical attention immediately.

Ingestion: Rinse mouth. Do not induce vomiting without advice from poison control center. Do not use mouth-to-mouth method if victim ingested the substance. Induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. If swallowed, seek medical advice immediately and show this container or label.

Notes to physician: In case of shortness of breath, give oxygen. Keep victim warm. Symptoms may be delayed.

General advice: If you feel unwell, seek medical advice (show the label where possible).

5. Fire-Fighting Measures

Flammable properties: Extremely flammable aerosol

Flammability Limits: Lower Explosive Limit: 1.5 Vol. %

Upper Explosive Limit: 11.0 Vol. %

Extinguishing Media: On large fires use dry chemical foam or water spray. On small fires use carbon dioxide (CO_2), dry chemical or water spray. **Firefighting equipment/instructions:** In the event of fire, cool tanks with water spray. Move containers from fire area if you can do it without risk. Self-contained breathing apparatus and full protective clothing must be worn in case of fire. **Specific hazards:** Hardened foam is an organic matter and will burn in the presence of sufficient heat, oxygen and ignition source.

6. Accidental Release Measures

Personal Precautions: ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Local authorities should be advised if significant spillages cannot be contained. Ensure adequate ventilation. Keep people away from and upwind of spill/leak. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Keep upwind. Ventilate closed spaces before entering. Keep unnecessary personnel away. Stay upwind. Keep out of low areas. Wear appropriate protective equipment and clothing during clean-up. **Environmental:** Prevent further leakage or spillage if safe to do so. Do not contaminate water.

Precautions: Dispose of plastic waste material (foam plastic) in accordance with all applicable guidelines and regulations.

Clean-up Methods: Remove from surfaces by scraping up excess material and removing residual residue with cloth and solvent such as acetone or mineral spirit, paint thinner, etc. Hardened foam can only be removed physically or mechanically by scraping, buffing. This material and its container must be disposed of as hazardous waste

7. Handling and Storage

Handling: Keep away from heat, spark, open flames and other sources of ignition. Do not breathe dust/fume/gas/mist/vapors/spray. Avoid contact with skin. Avoid contact with eyes. Do not use in areas without adequate ventilation. Wear personal protective equipment. Avoid prolonged exposure. Wash thoroughly after handling. Avoid release to the environment. Handle and open container with care. **Storage:** Flammable compressed gas storage. Store in a well-ventilated place. Keep out of the reach of children. Keep away from food, drink and animal feeding stuffs. Store in cool, dry place. Recommended storage temperature is between 40°F to 78°F (4.4°C to 25.5°C). Do not store above 104°F (40°C) will shorten shelf life. Protect containers from heat. Contents are under pressure do not pierce the containers. Protect from freezing.

8. Exposure Control / Personal Protection

Environmental effects: May cause long-term adverse effects in the environment. Persistence and Degradability: Not biodegradable Bioaccumulation / Accumulation: Does not accumulate in organisms Partition coefficient (n-octanol/water): Not available. Mobility in environmental media: No data available.

13. Disposal Consideration

Disposal instructions: This material and its container must be disposed of as hazardous waste. Must be incinerated in a suitable incineration plant holding a permit delivered by the competent authorities. Do not dispose of waste into sewer. Do not allow this material to drain into sewers/water supplies. This product, in its present state, when discarded or disposed of, is not a hazardous waste according to Federal regulations (40 CFR 261.4 (b)(4)). Under RCRA, it is the responsibility of the user of the product to determine, at the time of disposal, whether the product meets RCRA criteria for hazardous waste. Dispose in accordance with all applicable regulations.

Waste from residues / unused Products: Dispose of in accordance with local regulations.
